

# **AQUA PLUS & 780 COATING**

## **Matt and gloss**

### **PRODUCT**

#### **DESCRIPTION**

- Bristol **AQUAPLUS** is a non toxic PVA based, water bound semi gloss coating
- This product is particularly useful when mixed with the metallic colour range as a binder, this increases the durability and luminosity of the metallic finish
- Bristol **AQUAPLUS** can be mixed with all our paints and works as an extender and conditioner, greatly increasing the surface flexibility especially when applied to scenic cloth
- Bristol **780 COATING GLOSS** is a pure acrylic, water-based, high quality coating
- This coating can be used as a pre-treating agent and sealer for interior use as well as an effective exterior protective weather proof coating for paintwork
- Bristol **780 COATING GLOSS** also provides an alternative solution for sealing fireproofed plywood panels, as it seals substrate and prevents salts form leeching through the painted surfaces and damage finished work
- Bristol **780 COATING MATT** is a superior matt coating for "interior use only". Effective, non-staining and totally flat matt finish.

#### **APPLICATION**

To use **AQUAPLUS** as an intermix in conjunction with Bristol paint:

- Apply a base colour of Bristol paint.
- For the final coat intermix 25% of AQUAPLUS to colour for a more durable finish.

To use **AQUAPLUS** or **780 COATING** as a top dressing:

- Stir well before use.
- Dilute with water to a ratio of 1:1 or up to 1:2, this depends on the porosity of the substrate and the amount of sheen you require. For a gloss finish use undiluted.

#### **PROPERTIES**

- Drying time: 1-2 hours. Achieves maximum durability if left overnight
- Re-Coat: When touch dry
- Coverage: 12-15 square metres per litre
- Adhesion: Excellent on most surfaces
- Available sizes: 1 litre, 2.5 litres, 5 litres and 10 litres
- Application: Paint brush, roller or conventional spray system
- Warning: **Do not apply in cold conditions or high humidity!**

#### **CREATIVE IDEAS**

- Bristol **780 COATING** can be used as a glaze. For gloss apply full strength. To decrease sheen, dilute with water
- Bristol **AQUAPLUS** additive retards drying, extends the wet edge and is especially useful when rolling and spraying Metallic Paints
